Telegram Integration

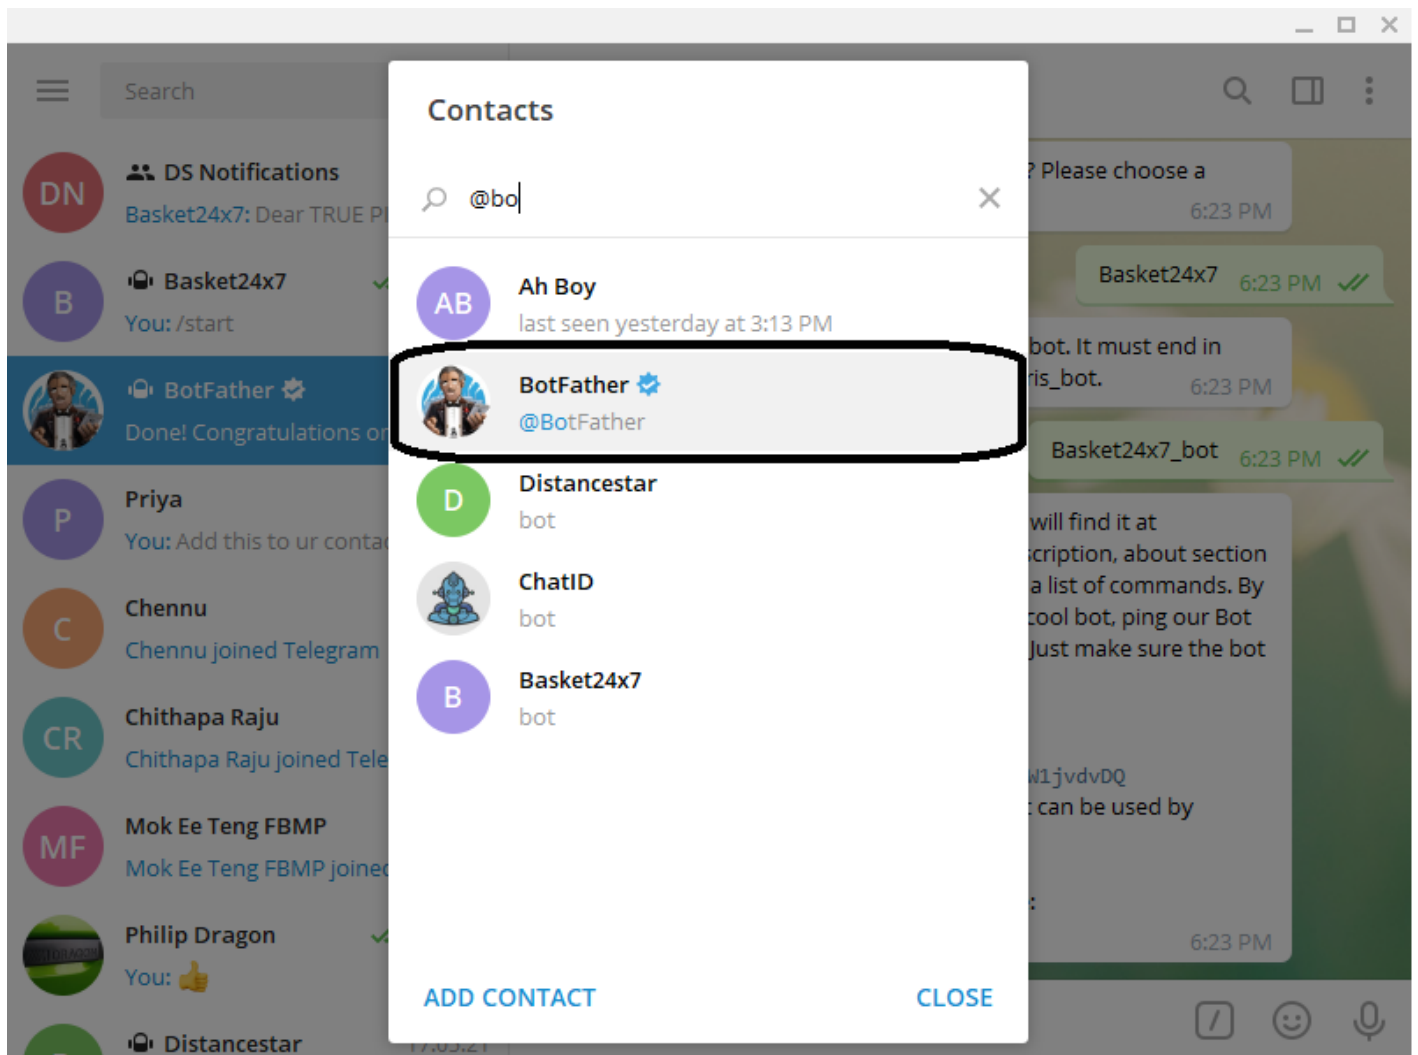

Create Chat Bot For An Application.

In the tbl_application we need to update Telegram chatbot Token ID.

To create a Chat bot

Step 1 : Add the BotFather to your chat account

The screenshot shows a Telegram interface with a list of contacts on the left and a chat window with BotFather on the right. The chat history shows BotFather asking for a name and username, and the user providing 'Basket24x7' and 'Basket24x7_bot' respectively. The current chat view shows a list of commands: **/newbot** create a new bot (labeled with a large '2'), **/mybots** edit your bots [beta], **/mygames** edit your games [beta], **/token** generate authorization token, and **/ revoke** revoke bot's access token. At the bottom of the chat input area, there is a text box containing a forward slash '/' (labeled with a large '1') and a blue send button.

BotFather Chat:

Alright, a new bot. How are we going to call it? Please choose a name for your bot. 6:23 PM

Basket24x7 6:23 PM ✓

Good. Now let's choose a username for your bot. It must end in `bot`. Like this, for example: TetrisBot or tetris_bot. 6:23 PM

Basket24x7_bot 6:23 PM ✓

Done! Congratulations on your new bot. You will find it at t.me/Basket24x7_bot. You can now add a description, about section and profile picture for your bot, see [/help](#) for a list of commands. By the way, when you've finished creating your cool bot, ping our Bot Support if you want a better username for it. Just make sure the bot

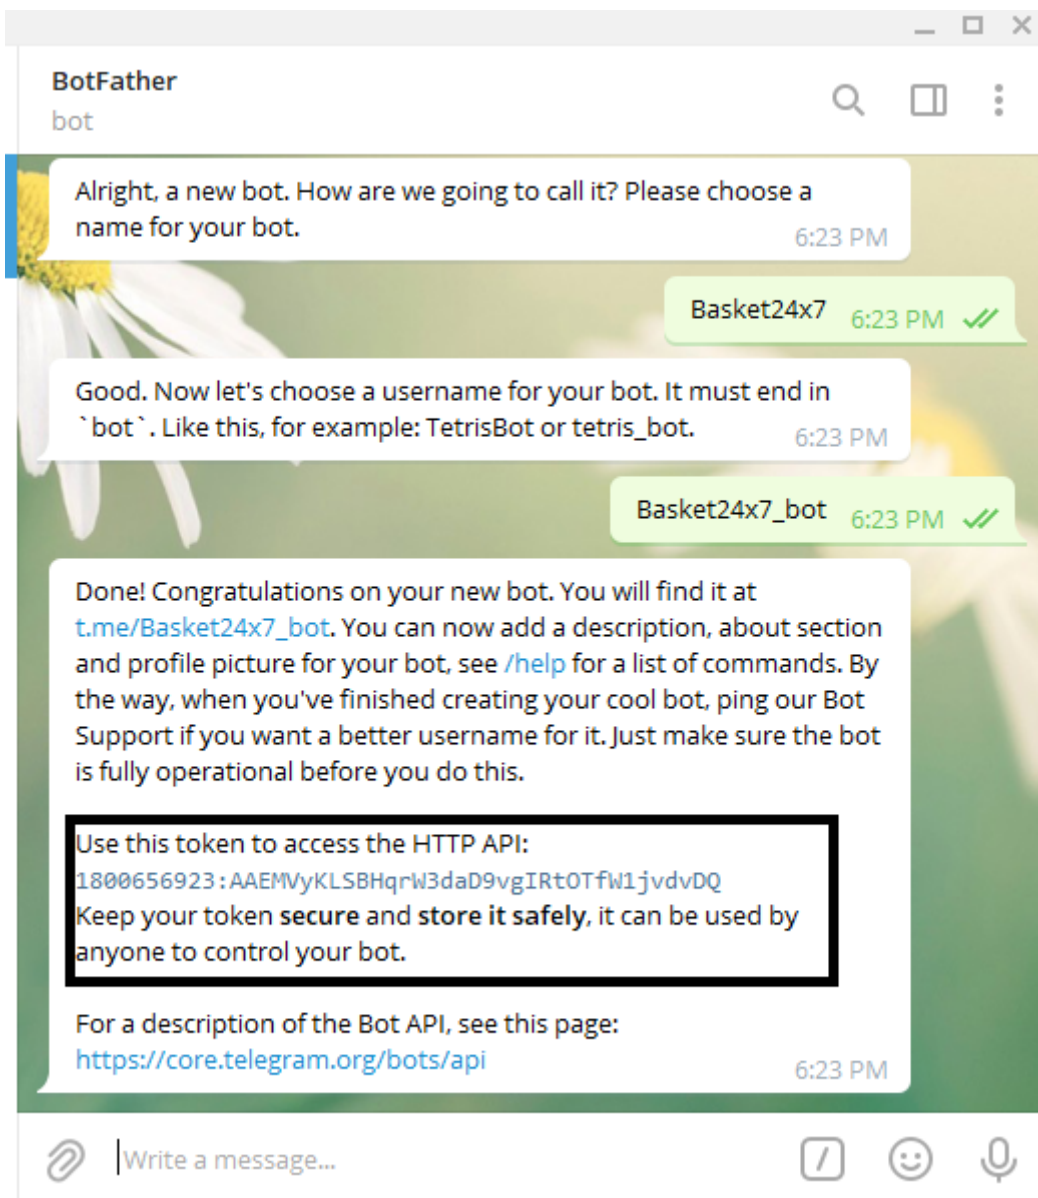

Commands:

- /newbot** create a new bot 2
- /mybots** edit your bots [beta]
- /mygames** edit your games [beta]
- /token** generate authorization token
- / revoke** revoke bot's access token

Input Area:

1

Follow the instruction to create a bot.

Use this token ID and update the tbl_application table in SSO on the respective Telegramchatbot field.

Update Member Chat ID and Company Chat ID

To update member chat ID in the member table of the application.

Click below link to get the member chat ID and update the number in member table of the respective application thru screen or database update.

https://telegram.me/cid_bot

To start receive message from the respective application member have to first accept the bot in to their contacts else member will not receive message from the bot. this is for security reason when working with bot.

For example if user wish to receive message from basket then click following link and click **start**

https://telegram.me/basket24x7_bot
